

# What Will You Find in This Chapter ?

The Dental Module is a comprehensive solution for efficient dental practice management. It allows users to create and customize clinic profiles with essential details such as address, contact info, and specific appointment slot session times.

In the technician setup, dental professionals can be added with their names, images, and customizable availability, including the option to assign specific services, tags, and manage maintenance schedules. The system offers flexibility with customizable time slots, days of operation, and service assignments.

A visually intuitive calendar view streamlines appointment and reservation management, providing a user-friendly and feature-rich environment tailored to the unique needs of dental professionals and clinics.
