Location Management

2.1 Location Setup Overview

In the "Location Setup" page, you gain control over your restaurant's geographical presence. Manage and add multiple locations effortlessly, ensuring an accurate representation of your brand across various areas. This feature is instrumental for establishments with multiple branches or those looking to expand their reach.

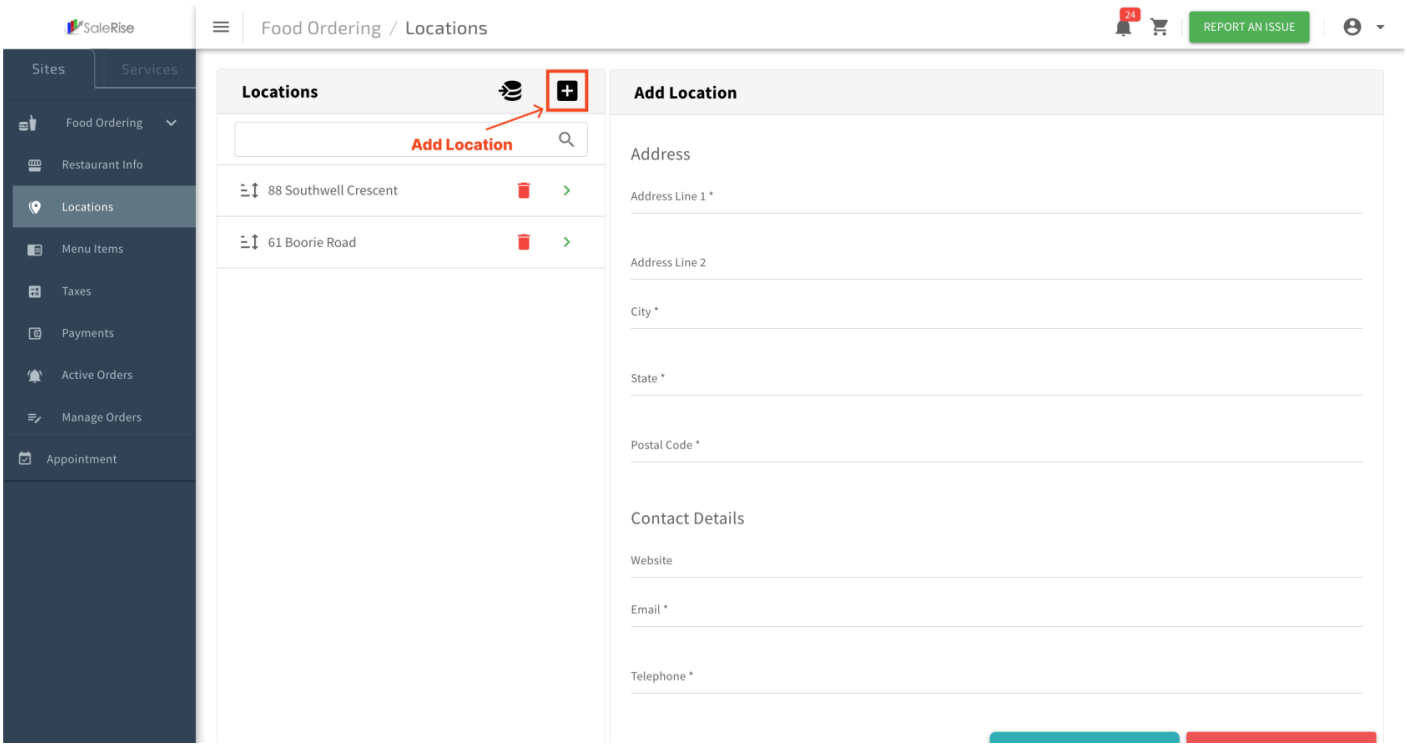

Manage Existing Locations:

- View and modify details of current restaurant locations.

Add New Locations:

- Seamlessly incorporate additional branches or locations as your business expands.

Edit Location:

- Easily edit existing ones to adapt to changes in your business landscape.
- Ensure that all information, including geographical details and services, is up-to-date for each location.
