# How to Add Image to Your Page ?

**Through this document , you will uncover the 'Image' feature properties in site editor page through these key elements:**

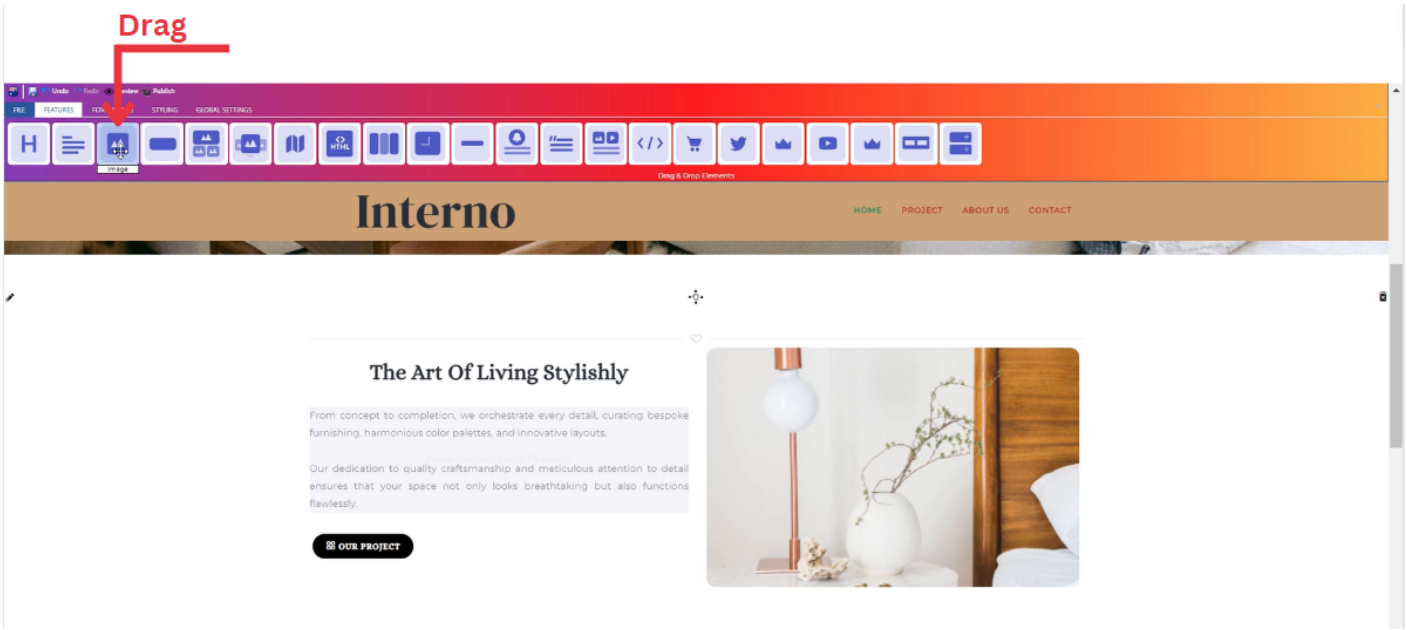

**1. Adding an Image**

**2. Feature Settings Window**

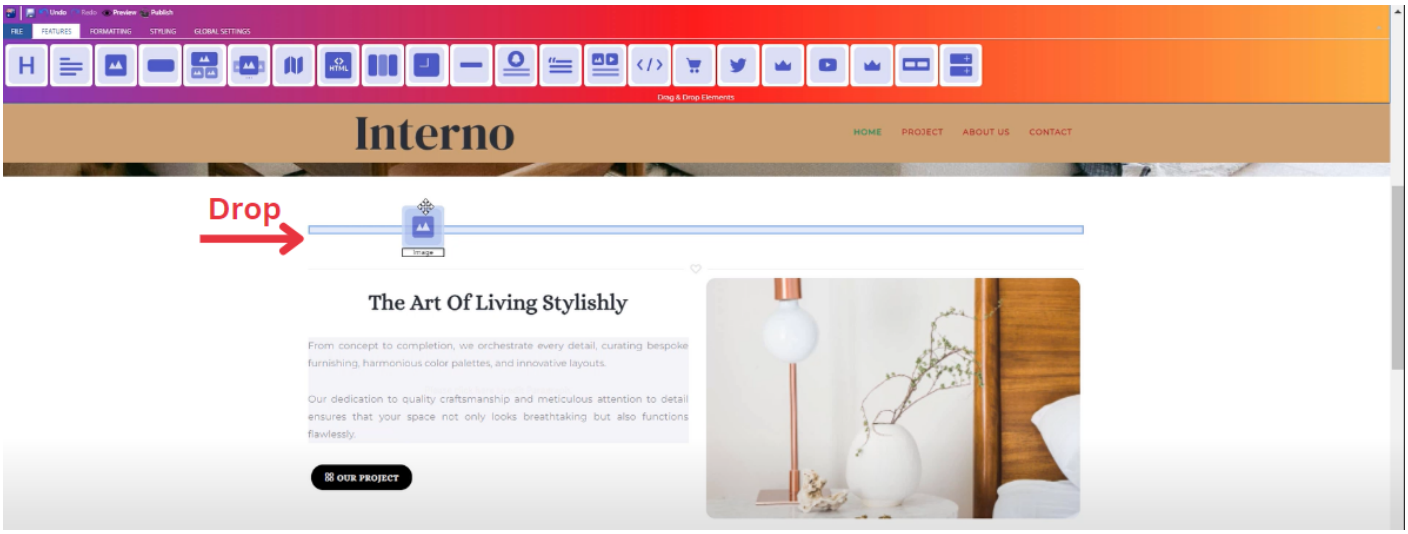

**3. Style Settings Window**

## Adding an Image

- Drag the Image icon from the available features

- Drop the Image icon into the desired location on your website page

# Feature Settings

Upon dropping the image , a settings window will appear, offering three main features:

- **Images**
  - Include an image on your website by choosing from three options: select from your uploaded images, use sample images from the website, or upload a new image.

---

- **Animations**
  - Add animation to your image from a long list of animation options.

- Enhance your animated image by incorporating timing in seconds.

# Style Settings

**Design Features**

- Access the "Design" feature to customize your image appearance. Within this feature, you can determine the following properties:
  - **Margin**: Set the spacing around your image to control its placement on the page.
  - **Border**: Define a border for your image to add a distinct visual element.
  - **Color**: Choose the color that best complements your website's theme or design.
  - **Style**: Apply different styles to your image, enhancing its visual appeal.
  - **Gradient**: Add gradient effects to your button for a more dynamic and modern look.

**Background Features**

- Navigate to the "Background" feature to enhance the backdrop of your image.

  - **Upload Images**: Insert images as a background for your image, providing visual interest.
  - **Sample Images**: Explore pre-loaded image samples for quick and easy background selection.
  - **Background Styling**: Customize the image background further with options like:
    - Background Repeat: Control how the background image repeats.
    - Background Fill: Adjust how the background fills the space around the image.
    - Background Position: Define the positioning of the background image for optimal display.

**Style Customization**

- Within the "Style" section, further refine your button presentation by adding classes from a dropdown list with a plethora of options.
- Determine how your image is visible on devices (Mobile , Tablet , Desktop , Large desktop).
